

ChemAxon

From the Back End to the Mobile Device

ChemAxon Roadmap in one sentence

Taking our world leading chemistry representation coupled with its enterprise grade platform (robust, scalable proven) and delivering solutions directly to the scientist in a modern, flexible, configurable intuitive user interfaces.

Building blocks

Best chemistry representation, industry leading back end.

Adopt our solutions to the changing habit of our customers

Enter the data where data is generated, can involve increase use of mobile devices

Collaboration increases more and more, flexible tools are needed

New developments

- Marvin JS
 - Full feature Marvin with zero install
- Plexus Suite
 - Comprehensive web-based chemical spreadsheet and scientist user interface
- Document to Structure/Document to Database
 - Searching for and indexing structures in disparate or unstructured data sources (hard drive, databases, sharepoint, documentum ...)

New Developments

- **Biologics**
 - HELM editor
 - Standardize, search, index register biologics
- **Markush**
 - Focus on extraction of Markush structures from documents
 - Working up for library design and white space
- **Compliance Checker**
 - Answer this, can I actually legal ship or make this and am I handling it right?

New Developments

- Open Innovation
 - Submission pages
 - In Silico Screening – Cheminformatics analysis
 - Full turnkey solution
- ChemCurator
 - For IP analysis
 - Extracting, visualizing and searching chemical information from patents etc

ChemAxon's commitment to the market

- Major life sciences companies
- Biotechs large and small
- CROs and service companies
- Verticals – agro-, fine-, petrochem
- Publishing, databases and learning
- Integration partners
- Academic institutes for research

ChemAxon – the future

Customer speaks my words 😊

„looking to the future, I don't know anyone else who I would trust my chemistry with ... other than with ChemAxon”
